	Preventative		Response	Storage/Disposal					
Do not breathe dusts / fume / spray. Wear protective gloves / protective clothing / eye protection / face protection.		/ If	If inhaled: Remove person to fresh air and keep comfortable for breathing.						
	d work clothing must not be allowed out of the workplace.	1	If exposed, concerned or feel unwell: Get medical advice/attention. Dispose of contents in						
	nly outdoors or in well ventilated areas. Wash thoroughly after handling.		If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.						
Do not handle	otain special instructions before use. e until all safety precautions have been read and understood.	If on skin: Wash with plenty of water. If irritation or rash occurs: Get medical advice/attention. Take off contaminated clothing and wash before reuse.							
Do not ea	at, drink or smoke when using this product.								

Section 2 – Hazard(	<b>(s)</b>	Identification	(continued)	)

2(c) Hazards Not Otherwise Classified: None Known

2(d) Unknown Acute Toxicity Statement (mixture): None Known

## Section 3 – Composition/Information on Ingredients

3(a-c) Chemical Name, Common Name (synonyms), CAS Number and Other Identifiers, and Concentration:						
Chemical Name	CAS Number	EC Number	% weight			
Iron	7439-89-6	231-096-4	>95			
Manganese	7439-96-5	231-105-1	≤2.0			
Nickel	7440-02-0	231-111-4	≤1.0			
Metallic Coating						
Iron	7439-89-6	231-096-4	≤0.8			
Zinc	7440-66-6	231-175-3	0.15 - 9.1			

EC- European Community

CAS- Chemical Abstract Service

Note: Depending on customer specifications, product surface may be treated with trace amounts (<0.1%) of corrosion-inhibiting or rust preventative that contains hexavalent chromium as applied.

## Section 4 – First-aid Measures

4(a) Description of Necessary Measures: If exposed, concerned or feel unwell: Get medical advice/attention.

- Inhalation: Galvanized (Hot Dipped) Sheet-Carbon Steel as sold/shipped is not a likely form of exposure. However, during further processing (welding, grinding, burning, etc.). If inhaled: Remove person to fresh air and keep comfortable for breathing. If exposed, concerned or feel unwell: Get medical advice/attention.
- Eye Contact: Galvanized (Hot Dipped) Sheet-Carbon Steel as sold/shipped is not a likely form of exposure. However, during further processing (welding, grinding, burning, etc.). If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue Rinsing. If eye irritation persists: Get medical advice attention. If exposed, concerned or feel unwell: Get medical advice/attention.
- Skin Contact: If on skin: Wash thoroughly after handling. Wash with plenty of water. If irritation or rash occurs: Get medical advice/attention. Take off and wash contaminated clothing before reuse.
- Ingestion: Galvanized (Hot Dipped) Sheet-Carbon Steel as sold/shipped is not a likely form of exposure. However, during further processing (welding, grinding, burning, etc.). If swallowed: Call a poison center/doctor if you feel unwell. Rinse mouth. If exposed, concerned or feel unwell: Get medical advice/attention.

#### 4(b) Most Important Symptoms/Effects, Acute and Delayed (chronic):

- Inhalation: Galvanized (Hot Dipped) Sheet-Carbon Steel as sold/shipped is not likely to present an acute or chronic health effect.
- Eye: Galvanized (Hot Dipped) Sheet-Carbon Steel as sold/shipped is not likely to present an acute or chronic health effect.
- Skin: Galvanized (Hot Dipped) Sheet-Carbon Steel as sold/shipped is not likely to present an acute or chronic health effect.
- Ingestion: Galvanized (Hot Dipped) Sheet-Carbon Steel as sold/shipped is not likely to present an acute or chronic health effect.

4(c) Immediate Medical Attention and Special Treatment: None Known

## **Section 5 – Fire-fighting Measures**

5(a) Suitable (and unsuitable) Extinguishing Media: Not applicable for Galvanized (Hot Dipped) Sheet–Carbon Steel as sold/shipped. Use extinguishers appropriate for surrounding materials.

5(b) Specific Hazards Arising from the Chemical: Not applicable for this product as sold/shipped. When burned, toxic smoke and vapor may be emitted.

**5(c)** Special Protective Equipment and Precautions for Fire-fighters: Self-contained NIOSH approved respiratory protection and full protective clothing should be worn when fumes and/or smoke from fire are present. Heat and flames cause emittance of acrid smoke and fumes. Do not release runoff from fire control methods to sewers or waterways. Firefighters should wear full face-piece self-contained breathing apparatus and chemical protective clothing with thermal protection. Direct water stream will scatter and spread flames and, therefore, should not be used.

## Section 6 - Accidental Release Measures

**6(a) Personal Precautions, Protective Equipment and Emergency Procedures:** Not applicable for **Galvanized (Hot Dipped) Sheet–Carbon Steel** as sold/shipped. For spills involving finely divided particles, clean-up personnel should be protected against contact with eyes and skin. If material is in a dry state, avoid inhalation of dust.

**6(b)** Methods and Materials for Containment and Clean Up: Not applicable for this product as sold/shipped. Fine, dry material should be removed by vacuuming or wet sweeping methods to prevent spreading of dust. Avoid using compressed air. Do not release into sewers or waterways. Collect material in appropriate, labeled containers for recovery or disposal in accordance with federal, state, and local regulations. Follow applicable OSHA regulations (29 CFR 1910.120) and all other pertinent state and federal requirements.

# Section 7 - Handling and Storage

7(a) Precautions for Safe Handling: Not applicable for Galvanized (Hot Dipped) Sheet–Carbon Steel as sold/shipped, however further processing (welding, burning, grinding, etc.) with the potential for generating high concentrations of airborne particulates should be evaluated and controlled as necessary. Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Practice good housekeeping. Avoid breathing metal fumes and/or dust. Do not eat, drink or smoke when using this product.

7(b) Conditions for Safe Storage, including any Incompatibilities: Store away from acids and incompatible materials.

# Section 8 - Exposure Controls / Personal Protection

8(a) Occupational Exposure Limits (OELs): Galvanized (Hot Dipped) Sheet–Carbon Steel as sold/shipped in its physical form does not present an inhalation, ingestion or contact hazard, nor would any of the following exposure data apply. However, operations such as high temperature (burning, welding), sawing, brazing, machining and grinding may produce fumes and/or particulates. The following exposure limits are offered as reference, for an experience industrial hygienist to review.

Ingredients	8(a) OSHA PEL <sup>1</sup>	ACGIH TLV <sup>2</sup>	NIOSH REL <sup>3</sup>	IDLH <sup>4</sup>
Iron	10 mg/m <sup>3</sup> (iron oxide fume)	5.0 mg/m <sup>3</sup> (iron oxide, respirable fraction <sup>5</sup> )	5.0 mg/m <sup>3</sup> (iron oxide dust and fume)	2,500 mg/m <sup>3</sup> (as Fe)
Manganese	"C" 5.0 mg/m <sup>3</sup> (as fume & inorganic compounds, as Mn)	0.02 mg/m <sup>3</sup> (as fume & inorganic compounds, as Mn, respirable fraction)	1.0 mg/m <sup>3</sup> (as fume & inorganic compounds, as Mn)	500 mg/m <sup>3</sup> (as Mn)
		0.1 mg/m <sup>3</sup> (as fume & inorganic compounds, as Mn, inhalable fraction <sup>6</sup> )	"STEL" 3.0 mg/m <sup>3</sup> (as fume & inorganic compounds, as Mn)	
Nickel	1.0 mg/m <sup>3</sup> (metal, insoluble & soluble compounds, as Ni)	1.5 mg/m <sup>3</sup> (metal, as Ni, as inhalable fraction)	0.015 mg/m <sup>3</sup> (metal & insoluble and soluble compounds, as Ni)	10 mg/m³ (as Ni)
		0.2 mg/m <sup>3</sup> (insoluble compounds, as Ni, inhalable fraction, inorganic only)		
		0.1 mg/m <sup>3</sup> (soluble compounds, as Ni, inhalable fraction, inorganic only)		
Zinc	15 mg/m <sup>3</sup> (as zinc oxide, total dust) 5.0 mg/m <sup>3</sup> (as zinc oxide, respirable	2.0 mg/m <sup>3</sup> (as zinc oxide, respirable fraction)	5.0 mg/m <sup>3</sup> (as zinc oxide dust or fume)	500 mg/m <sup>3</sup> (as zinc oxide)
	fraction & zinc oxide fume)	"STEL" 10 mg/m <sup>3</sup> (as zinc oxide, respirable fraction)	"STEL" 10 mg/m <sup>3</sup> (as zinc oxide fume)	
			"C" 15 mg/m <sup>3</sup> (as zinc oxide dust)	

NE - None Established

- 1. OSHA PELs (Permissible Exposure Limits) are 8-hour TWA (time-weighted average) concentrations unless otherwise noted. A ("C") designation denotes a ceiling limit, which should not be exceeded during any part of the working exposure unless otherwise noted. A Short Term Exposure Limit (STEL) is defined as a 15-minute exposure, which should not be exceeded at any time during a workday. An Action level (AL) is used by OSHA and NIOSH to express a health or physical hazard. They indicate the level of a harmful or toxic substance/activity, which requires medical surveillance, increased industrial hygiene monitoring, or biological monitoring. Action Levels are generally set at one half of the PEL but the actual level may vary from standard to standard. The intent is to identify a level at which the vast majority of randomly sampled exposures will be below the PEL.
- Threshold Limit Values (TLV) established by the American Conference of Governmental Industrial Hygienists (ACGIH) are 8-hour TWA concentrations unless otherwise noted. ACGIH TLVs are for guideline purposes only and as such are not legal, regulatory limits for compliance purposes. DSEN – May cause dermal sensitization. This notation is used to indicate the potential for dermal sensitization resulting from the interaction of an absorbed agent and ultraviolet light (i.e. photosensitization). RSEN – May cause respiratory sensitization.
- 3. The National Institute for Occupational Safety and Health Recommended Exposure Limits (NIOSH-REL)- Compendium of Policy and Statements. NIOSH, Cincinnati, OH (1992). NIOSH is the federal agency designated to conduct research relative to occupational safety and health. As is the case with ACGIH TLVs, NIOSH RELs are for guideline purposes only and as such are not legal, regulatory limits for compliance purposes.
- 4. The "immediately dangerous to life or health air concentration values (IDLHs)" are used by NIOSH as part of the respirator selection criteria and were first developed in the mid-1970's by NIOSH. The Documentation for Immediately Dangerous to Life or Health Concentrations (IDLHs) is a compilation of the rationale and sources of information used by NIOSH during the original determination of 387 IDLHs and their subsequent review and revision in 1994. Ca is designated as carcinogen.
- 5. Respirable fraction. The concentration of respirable dust for the application of this limit is to be determined from the fraction passing a size-selector with the characteristics defined in ACGIH 2020 TLVs ® and BEIs ® Appendix D, paragraph C.
- 6. Inhalable fraction. The concentration of inhalable particulate for the application of this TLV is to be determined from the fraction passing a size-selector with the characteristics defined in the ACGIH 2020 TLVs <sup>®</sup> and BEIs <sup>®</sup> (Biological Exposure Indices) Appendix D, paragraph A.

**8(b)** Appropriate Engineering Controls: Use controls as appropriate to minimize exposure to metal fumes and dusts during handling operations. Provide general or local exhaust ventilation systems to minimize airborne concentrations. Local exhaust is necessary for use in enclosed or confined spaces. Provide sufficient general/local exhaust ventilation in pattern/volume to control inhalation exposures below current exposure limits.

#### 8(c) Individual Protection Measures:

• **Respiratory Protection:** Seek professional advice prior to respirator selection and use. Follow OSHA respirator regulations (29 CFR 1910.134) and, if necessary, use only a NIOSH-approved respirator. Select respirator based on its suitability to provide adequate worker protection for given working conditions, level of airborne contamination, and presence of sufficient oxygen. Concentration in air of the various contaminants determines the extent of respiratory protection needed. Half-face, negative-pressure, air-purifying respirator equipped with P100 filter is acceptable for concentrations up to 10 times the exposure limit. Full-face, negative-pressure, air-purifying negative-pressure and powered air respirators is limited. Use a positive-pressure-demand, full-face, supplied air respirator or self-contained breathing apparatus (SCBA) for concentrations above 50 times the exposure limit. If exposure is above the IDLH (Immediately dangerous to life or health) for any of the constituents, or there is a possibility of an uncontrolled release or exposure levels are unknown, then use a positive-demand, full-face, supplied air respirator with escape bottle or SCBA.

Warning! Air-purifying respirators both negative-pressure and powered-air do not protect workers in oxygen-deficient atmospheres.

# Section 8 - Exposure Controls / Personal Protection (continued)

8(c) Individual Protection Measures (continued):

- Eyes: Wear appropriate eye protection to prevent eye contact. For operations, which result in elevating the temperature of the product to or above its melting point or result in the generation of airborne particulates, use safety glasses to prevent eye contact. Contact lenses should not be worn where industrial exposures to this material are likely. Use safety glasses or goggles as required for welding, burning, sawing, brazing, grinding or machining operations.
- Skin: Wear appropriate personal protective clothing to prevent skin contact. Cut resistant gloves and sleeves should be worn when working with steel products. For operations, which result in elevating the temperature of the product to or above its melting point or result in the generation of airborne particulates, use protective clothing, and gloves to prevent skin contact. Protective gloves should be worn as required for welding, burning or handling operations. Contaminated work clothing must not be allowed out of the workplace.
- Other protective equipment: An eyewash fountain and deluge shower should be readily available in the work area.

## **Section 9 - Physical and Chemical Properties**

<b>Q</b> (a) Announce (aboviation state and a state). Matallia Course Orientees	
9(a) Appearance (physical state, color, etc.): Metallic Gray, Odorless	9(j) Upper/lower Flammability or Explosive Limits: NA

ND Not Determined for one heat on a solution	

ND - Not Determined for product as a whole

# Section 10 - Stability and Reactivity

10(a) Reactivity: Not Determined (ND)

10(b) Chemical Stability: Steel products are stable under normal storage and handling conditions.

10(c) Possibility of Hazardous Reaction: None Known

**10(d)** Conditions to Avoid: Storage with strong acids or calcium hypochlorite.

**10(e)** Incompatible Materials: Will react with strong acids to form hydrogen. Iron oxide dusts in contact with calcium hypochlorite evolve oxygen and may cause an explosion.

**10(f) Hazardous Decomposition Products:** Thermal oxidative decomposition of steel products can produce fumes containing oxides of iron and manganese as well as other alloying elements.

# **Section 11 - Toxicological Information**

11(a-e) Information on toxicological effects: The following toxicity data has been determined for Galvanized (Hot Dipped) Sheet–Carbon Steel as a mixture when further processed using the information available for its components applied to the guidance on the preparation of an SDS under the GHS requirements of OSHA and the EU CPL:

Hazard Classification	Hazard ( EU	Category OSHA	Hazard Signal Symbols Word		Hazard Statement
Acute Toxicity Hazard (covers Categories 1-5)	NA*	4 <sup>a</sup>		Warning	Harmful if swallowed.
Eye Damage/ Irritation (covers Categories 1, 2A and 2B)	NA*	2B <sup>c</sup>	No Pictogram	Warning	Causes eye irritation.
<b>Skin/Dermal Sensitization</b> (covers Category 1)	NA*	1 <sup>d</sup>		Warning	May cause an allergic skin reaction.
<b>Carcinogenicity</b> (covers Categories 1A, 1B and 2)	NA*	2 <sup>g</sup>		Warning	Suspected of causing cancer.
<b>Toxic to Reproduction</b> (covers Categories 1A, 1B and 2)	NA*	2 <sup>h</sup>		Warning	Suspected of damaging fertility or the unborn child.
Specific Target Organ Toxicity (STOT) Following Single Exposure (covers Categories 1-3)	NA*	3 <sup>i</sup>		Warning	May cause respiratory irritation.

### Section 11 - Toxicological Information (continued)

The following health hazard information is provided regardless to classification criteria and is based on the individual component(s) and potential resultant components from further processing:

#### Acute Effects by component:

- Iron and oxides: Iron is harmful if swallowed, causes skin irritation, and causes eye irritation. Contact with iron oxide has been reported to cause skin irritation and serious eye damage.
- Manganese and oxides: Manganese and Manganese oxide are harmful if swallowed.
- Nickel and oxides: Nickel may cause allergic skin sensitization. Nickel oxide may cause an allergic skin.
- Zinc and zinc oxides: Not Reported/ Not Classified

#### Delayed (chronic) Effects by component:

- Iron and oxides: Chronic inhalation of excessive concentrations of iron oxide fumes or dusts may result in the development of a benign pneumoconiosis, called siderosis, which is observable as an X-ray change. No physical impairment of lung function has been associated with siderosis. Inhalation of excessive concentrations of ferric oxide may enhance the risk of lung cancer development in workers exposed to pulmonary carcinogens. Iron oxide is listed as a Group 3 (not classifiable) carcinogen by IARC.
- Manganese and oxides: Chronic exposure to high concentrations of manganese fumes and dusts may adversely affect the central nervous system with symptoms including languor, sleepiness, weakness, emotional disturbances, spastic gait, mask-like facial expression and paralysis. Animal studies indicate that manganese exposure may increase susceptibility to bacterial and viral infections. Occupational overexposure (Manganese) is a progressive, disabling neurological syndrome that typically begins with relatively mild symptoms and evolves to include altered gait, fine tremor, and sometimes, psychiatric disturbances. May cause damage to lungs with repeated or prolonged exposure. Neurobehavioral alterations in worker populations exposed to MnO including: speed and coordination of motor function are especially impaired.
- Nickel and oxides: Exposure to nickel dusts and fumes can cause sensitization dermatitis, respiratory irritation, asthma, pulmonary fibrosis, edema, and may cause nasal or lung cancer in humans. Causes damage to lungs through prolonged or repeated inhalation exposure. IARC lists nickel and certain nickel compounds as Group 2B carcinogens (sufficient animal data). ACGIH 2020 TLVs® and BEIs® lists insoluble nickel compounds as confirmed human carcinogens. Suspected of damaging the unborn child.
- Zinc and zinc oxides: Zinc is a low health risk by inhalation and should be treated as a nuisance dust. Inhalation of zinc oxide fumes may cause metal fume fever, which is characterized by flu-like symptoms with metallic taste, fever, chills, cough, weakness, chest pain, muscle pain and increased white blood cell count.

## **Section 12 - Ecological Information**

12(a) Ecotoxicity (aquatic & terrestrial): No Data Available for Galvanized (Hot Dipped) Sheet–Carbon Steel as sold/shipped. However, individual components of the product when processed have been found to be toxic to the environment. Metal dusts may migrate into soil and groundwater and be ingested by wildlife as follows:

- Iron Oxide:  $LC_{50}$ : >1000 mg/L; Fish 48 h- $EC_{50}$  > 100 mg/L (Currenta, 2008k); 96 h- $LC_0 \ge 50,000$  mg/l. Test substance: Bayferrox 130 red (95 97% Fe<sub>2</sub>O<sub>3</sub>; < 4% SiO<sub>2</sub> and Al<sub>2</sub>O<sub>3</sub>) (Bayer, 1989a).
- Nickel Oxide: IUCLID found LC<sub>50</sub> in fish, invertebrates and algae > 100 mg/l.
- Zinc: EU RAR lists as Category 1 Very toxic to aquatic life with long lasting effects.
- 12(b) Persistence & Degradability: No Data Available
- 12(c) Bioaccumulative Potential: No Data Available

12(d) Mobility (in soil): No data available for Galvanized (Hot Dipped) Sheet – Carbon Steel as sold/shipped. However, individual components of the product have been found to be absorbed by plants from soil.

12(e) Other adverse effects: None Known

#### **Additional Information:**

Hazard Category: Category 1

**Hazard Symbol:** 

Signal Word: Warning

Hazard Statement: Very Toxic to aquatic life with long lasting effects.

#### **Section 13 - Disposal Considerations**

**Disposal:** Galvanized (Hot Dipped) Sheet–Carbon Steel should be recycled whenever possible. Product dusts and fumes from processing operations should also be recycled or classified by a competent environmental professional and disposed of in accordance with applicable federal, state or local regulations.

**Container Cleaning and Disposal:** Follow applicable federal, state and local regulations. Observe safe handling precautions. European Waste Catalogue (EWC): 16-01-17 (ferrous metals), 12-01-99 (wastes not otherwise specified), 16-03 (off specification batches and unused products), or 15-01-04 (metallic packaging).

Please note this information is for Galvanized (Hot Dipped) Sheet-Carbon Steel in its original form. Any alterations can void this information.

Section 1	15 -	<b>Regulatory</b>	Information				
<b>Regulatory Information</b> : The following listing of regulations should not be solely relied upon for all regulatory compliants			er Stud Building Prod	lucts	s product may not b	e complete and	
This product and/or its constituents are subject to the follow	ving r	egulations:					
SARA Potential Hazard Categories: Immediate Acute He	ealth	Hazard; Delayed	Chronic Health Haza	ard			
Section 313 Supplier Notification: The product, Galvaniz							
to the reporting requirements of section 313 of Title III of the CAS # Chemical Name	-	ent by Weight	its and Reauthorizatio	m A	ct of 1986 and 40 C.	FR part 372:	
7439-96-5 Manganese		.0 max					
7440-02-0 Nickel		.0 max					
7440-66-6 Zinc		.1 max					
State Regulations: The product, Galvanized (Hot Dipped) Sheet–Carbon Steel as a whole is not listed in any state regulations. However, individual components of the product are listed in various state regulations:         California Prop.       This product can expose you to chemicals including nickel (metallic) which is known to the State of California to cause cancer; and no chemicals which is known to the State of California to cause reproductive toxicity. In addition, this product can be ordered with an optional passivation treatment that contains hexavalent chromium, which is known to the State of California to cause reproductive toxicity. For more information go							
to <u>www.P65Warnings.ca.gov</u> .							

## **Section 15 - Regulatory Information (continued)**

#### **Other Regulations:**

WHMIS Classification (Canadian): The product, Galvanized (Hot Dipped) Sheet–Carbon Steel is not listed as a whole. However individual components are listed.

Ingredients	WHMIS Classification
Iron	Combustible dusts - Category 1
Manganese	Reproductive toxicity - Category 2; Specific target organ toxicity - repeated exposure - Category 1; Combustible dusts*
Nickel	Skin sensitization - Category 1; Carcinogenicity - Category 2; Specific target organ toxicity - repeated exposure - Category 1

\*This product could belong to the hazard class "Combustible dust", based on various factors related to the combustibility and explosiveness of its dust, including composition, shape and size of the particles

This product has been classified in accordance with the hazard criteria of the Controlled Products Regulations and the SDS contains all the information required by the Controlled Products Regulations.

#### **Section 16 - Other Information**

Prepared By: Super Stud Building Products

#### **Revision History:**

Revision History: 4/1/2014 - Original Expiration Date: 2/1/2024 4/1/2017 Update Section 1

4/1/2021 Update Emergency Phone Number

3/6/2025 Update Section 1

#### **Additional Information:**

#### Hazardous Material Identification System (HMIS) Classification

Health Hazard	1
Fire Hazard	0
Physical Hazard	0

ABBREVIATIONS/ACRONYMS:

HEALTH= 1, Denotes possible chronic hazard if airborne dusts or fumes are generated Irritation or minor reversible injury possible.

FIRE=0, Materials that will not burn.

PHYSICAL HAZARD= 0, Materials that are normally stable, even under fire conditions, and will not react with water, polymerize, decompose, condense, or self-react. Non-explosives.

# National Fire Protection Association (NFPA)

Expiration Date: 03/06/2028

HEALTH = 1, Exposure could cause irritation but only minor residual injury even if no treatment is given. FIRE = 0, Materials that will not burn.

INSTABLITY = 0, Normally stable, even under fire exposure conditions, and are not reactive with water.
